NOTES

- The anchor plates serve as attachment points for the ropes and tension rod system.
- The anchor plates are compatible with numerous clevis-ends as well as with the toggle. The compatibility is described in the technical data sheet.
- The anchorage must be able to transfer at least the component resistance. This is possible with commercially available composite anchors under the following conditions:
- Concrete quality C25/30 (cracked), anchor rod A4-70, composite epoxy resin high-performance injection anchor or vinyl ester urethane mortar anchor.
- Please refer to the additional information and planning guide in the Forte catalog.
